Dear Bill and Preston,

I inspected the Dove Creek quarry on August 29 and was, to say the least, a bit disappointed. The old car had been just pushed onto private land, not removed as I had directed. You need to have the land owner's permission to store the car there and I need a copy of that permission in writing for my files. I do not sanction what was done with the old car and want proof that it was done in violation of Forest Service direction. If permission was not obtained, you will remove the car immediately. That private land is within the National Forest legal boundary.

The two un-approved camps have been removed. Trash at both sites still needs to be cleaned up. You will remove the all trash at both sites immediately. Until this has been done you are still in non compliance with the Plan of Operation and subject to a complete shut down order.

Notify me when the car and camp situations are corrected as directed above.

Sincerely,

Gordon Struthers
Minerals Management Specialist
